Subject: intro blurb for website

Hi Lori,

Can you please review the below paragraph for the intro on the website? The sentence about the pdf and excel docs was recommended, since the website will divide them up by type, and they won't just be in a straight list in order. Thx.

jill

EPA is partially approving and partially disapproving Oregon's 2012 Impaired Waters List. EPA is proposing the addition of a total of 1,055 water quality limited segments to Oregon's 303(d) list. Please see the below letter, enclosures and appendices for detailed information on this action, as well as the supporting data and information EPA relied upon to make these decisions. Please note PDF's are below, while Excel documents are in the box to the right. EPA is seeking public comment on these additions. Comments can be submitted through February 6, 2017 to Jill Fullagar at Fullagar.jill@epa.gov and should include the subject line "OR 2012 comment period." Separate from the comment period on EPA's proposed additions, EPA is also seeking data, information and comments on potential aquatic life impairments in Oregon coastal marine waters. Please see Enclosure 2 for details regarding the specific nature of the information being sought, and submit any comments by the close of the comment period, which is also open through February 6, 2017. These comments can also be sent to Jill Fullagar at Fullagar.jill@epa.gov and should include the subject line "OR 2012 comment period."
